Re: WC Docket No. 03-133

Dear Chairman Powell:

I am writing to add my voice to the growing number of groups and individuals opposed to efforts by the local Bell telephone companies to circumvent current rules on calls placed with a pre-paid calling card. If they succeed, it will result in higher rates -- in many cases, dramatically higher rates -- for consumers who place the calls. As you approach your work on this docket, I implore you to keep the needs of consumers in mind rather than the pleadings of the four Bell companies.

The Bell companies want to target those calls in which a caller uses a pre-paid calling card and dials a toll-free number, along with his or her PIN. The caller, who may be in Virginia, for example, is connected to a "platform" in another state -- let's say in Nebraska. From this "platform," he or she hears a message about a company, non-profit or person. The caller then dials the telephone number of someone in Virginia. Current rules, as well as common sense, state that this represents two calls, one from Virginia to Nebraska and one from Nebraska to Virginia. Both calls are subject to interstate access charges because there is a call to Nebraska and then a separate call to Virginia.

But the Bell companies want to treat this as a single in-state call so they can levy exorbitant in-state access charges. Such fees have no relationship whatsoever to the Bell companies' actual costs, which are only a fraction of what they want to charge consumers.

Prices are already rising for gas, milk and other products. Consumers don't need higher prices for phone calls too, especially when these higher rates represent a blatant giveaway to four large corporations.

I am aware that the long distance companies and others that sell pre-paid calling cards have weighed in with the FCC in an effort to protect their customers' interests in this manner. It is now time for the FCC to weigh in on the side of consumers and show the Bell companies the door on this issue.

Sincerely,

A handwritten signature in dark ink, appearing to read "Michael K. Powell", followed by a long horizontal flourish and the letters "MA".

RE: WC Docket No. 03-133

Dear Chairman Powell and Commissioners:

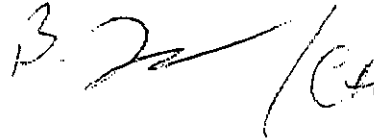

The FCC should **not** impose new access charges and fees upon prepaid calling cards. If you move to increase the cost of these cards, you will simply drive up the cost for minority or disadvantaged individuals to stay in touch in their communities.

Asian-Americans, including Chinese-Americans, are among the fastest adopters of pre-paid cards. Ten percent of Asian-American households have used them, and this number is growing. Moreover, the affordability of pre-paid cards is of the utmost importance to low- and fixed-income consumers, since they offer an easy, economical way to stay in touch with friends and relatives across the country.

With other goods like gas and milk rising these days, we should not now be faced with rising telephone costs as well. In particular, many low-income households who are on fixed incomes depend upon prepaid service because they cannot meet the credit rating or hefty deposit requirements that local phone companies insist upon before getting a phone. With prepaid cards, consumers can make calls from payphones or the telephones of family members and neighbors. They can use these cards to stay "connected" as they look for jobs, hunt for housing, or schedule many of the other daily appointments that we all have.

I simply find it unimaginable that the FCC would impose new charges and fees on these cards. Some of the nation's largest local telephone companies would be the biggest recipients of such charges. **The FCC should stand up for consumers and make sure that these charges will not apply to prepaid calling cards.**

Sincerely,

Re: WC Docket No. 03-133

Dear Chairman Powell:

I am writing to add my voice to the growing number of groups and individuals opposed to efforts by the local Bell telephone companies to circumvent current rules on calls placed with a pre-paid calling card. If they succeed, it will result in higher rates -- in many cases, dramatically higher rates -- for consumers who place the calls. As you approach your work on this docket, I implore you to keep the needs of consumers in mind rather than the pleadings of the four Bell companies.

The Bell companies want to target those calls in which a caller uses a pre-paid calling card and dials a toll-free number, along with his or her PIN. The caller, who may be in Virginia, for example, is connected to a "platform" in another state -- let's say in Nebraska. From this "platform," he or she hears a message about a company, non-profit or person. The caller then dials the telephone number of someone in Virginia. Current rules, as well as common sense, state that this represents two calls, one from Virginia to Nebraska and one from Nebraska to Virginia. Both calls are subject to interstate access charges because there is a call to Nebraska and then a separate call to Virginia.

But the Bell companies want to treat this as a single in-state call so they can levy exorbitant in-state access charges. Such fees have no relationship whatsoever to the Bell companies' actual costs, which are only a fraction of what they want to charge consumers.

Prices are already rising for gas, milk and other products. Consumers don't need higher prices for phone calls too, especially when these higher rates represent a blatant giveaway to four large corporations.

I am aware that the long distance companies and others that sell pre-paid calling cards have weighed in with the FCC in an effort to protect their customers' interests in this manner. It is now time for the FCC to weigh in on the side of consumers and show the Bell companies the door on this issue.

Sincerely, *Edward Ling* *Michigan*

Re: WC Docket No. 03-133

Dear Chairman Powell:

I am writing to add my voice to the growing number of groups and individuals opposed to efforts by the local Bell telephone companies to circumvent current rules on calls placed with a pre-paid calling card. If they succeed, it will result in higher rates – in many cases, dramatically higher rates – for consumers who place the calls. As you approach your work on this docket, I implore you to keep the needs of consumers in mind rather than the pleadings of the four Bell companies.

The Bell companies want to target those calls in which a caller uses a pre-paid calling card and dials a toll-free number, along with his or her PIN. The caller, who may be in Virginia, for example, is connected to a "platform" in another state -- let's say in Nebraska. From this "platform," he or she hears a message about a company, non-profit or person. The caller then dials the telephone number of someone in Virginia. Current rules, as well as common sense, state that this represents two calls, one from Virginia to Nebraska and one from Nebraska to Virginia. Both calls are subject to interstate access charges because there is a call to Nebraska and then a separate call to Virginia.

But the Bell companies want to treat this as a single in-state call so they can levy exorbitant in-state access charges. Such fees have no relationship whatsoever to the Bell companies' actual costs, which are only a fraction of what they want to charge consumers.

Prices are already rising for gas, milk and other products. Consumers don't need higher prices for phone calls too, especially when these higher rates represent a blatant giveaway to four large corporations.

I am aware that the long distance companies and others that sell pre-paid calling cards have weighed in with the FCC in an effort to protect their customers' interests in this manner. It is now time for the FCC to weigh in on the side of consumers and show the Bell companies the door on this issue.

Sincerely,

Chairman Michael Powell  
Federal Communications Commission

Dear Mr. Powell:

As the father of college students, I have relied on pre-paid calling cards as a convenient way to keep in contact with my children while controlling expenses. I have found for my long-distance calling needs, pre-paid calling cards are best. Portability, universal acceptance and predictability make them a great product.

Now I am told that the world of prepaid cards may turn upside down, just because the monopoly telephone companies, such as SBC here in Indiana, want to make even more money. As I understand it, these companies want the FCC to redefine calling-card calls so they become more expensive. No better service, no new features. Just more money.

Why reclassifying pre-paid calls as instate helps the consumers eludes me. And how SBC knows I'm calling instate is a mystery. Everybody knows by now that an instate call and an interstate call are identical to the phone company. They should be to the consumer as well.

I like to talk to my children at college and I'd like for them to be able to continue using a convenient and inexpensive method of calling. Don't take it away. And for heaven's sake, don't do it just so that SBC can make even more money.

Thanks for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'David Dawson', with a stylized, flowing script.

RE: WC Docket No. 03-133

Dear Chairman Powell,

I am writing to ask that the FCC not impose new hidden charges and fees on prepaid calling card services.

Minorities, low-income families, senior citizens, immigrants, college students and military families rely upon calling card services for a variety of needs. Many of these consumers do not have a credit history, bank accounts, or the means to pay a large deposit for local telephone service. For these consumers, a prepaid card may be the only option they have to stay connected - to make phone calls to look for a job, for affordable housing, make a doctor's appointment, or stay in touch with family and friends. These cards offer convenience and predictable cost, as there are no hidden fees or charges. In economically disadvantaged areas, consumers literally risk being disconnected if the prices of these cards increase. Prepaid calling cards are indispensable to consumer groups because they are an affordable alternative to regular and wireless telephone services.

But such price hikes are precisely what the FCC will do if it inflicts new "in-state" access charges and other fees on pre-paid cards. The fees would funnel directly to large local telephone companies while the burden would fall squarely upon those consumers that can least afford to bear it.

Adding access charges to be paid to local telephone companies will substantially increase the per minute charges on pre-paid calls, jeopardizing the benefits Latino and other communities gain from these services. Please stop any effort to raise rates on American consumers and decide that these services are not subject to the exorbitant new access charges and other fees.

Sincerely,

*Manuelita Dominguez / New Mexico*

RE: WC Docket No. 03-133

Chairman Powell:

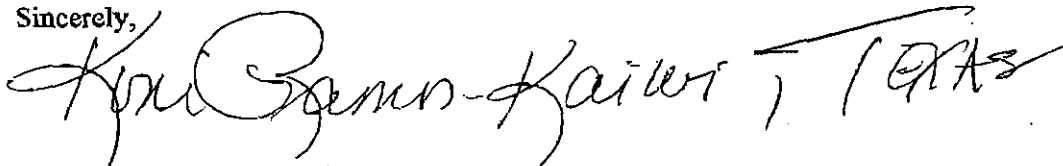

The FCC should **not** impose new access charges and fees upon prepaid calling cards. If you move to increase the cost of these cards, you will simply drive up the cost for minority or disadvantaged individuals to stay in touch in their communities.

The Latino community is particularly sensitive to any price increase for pre-paid calling cards; approximately 43% of Latino households use them. Indeed, half of the households with incomes below \$20,000 have used prepaid cards. Pre-paid calling cards are so prevalent in part because they save consumers money.

With gas and milk prices already holding fixed and low income consumers hostage, we should not be faced with rising telephone service costs as well. In particular, many low-income households who are on fixed incomes depend entirely upon prepaid service because they cannot meet the credit rating or hefty deposit requirements that local phone companies insist upon before getting a phone. With prepaid cards, consumers can make calls from payphones or the telephones of family members and neighbors. We can use these cards to stay "connected" as we look for jobs, hunt for houses, or schedule many of the other daily appointments that we all have.

I simply find it unimaginable that the FCC would impose new charges and fees on these cards. Some of the nation's largest telephone companies would be the largest beneficiaries of such charges. **The FCC should stand up for consumer interests over corporate gain by keeping affordable prepaid calling cards a priority.**

RE: WC Docket No. 03-133

Dear Chairman Powell:

Latino and other minority communities rely upon low-cost telecommunications services to accomplish many every day tasks, from looking for a job or affordable housing to staying in touch with family and friends. But pending before the FCC is a proposal that would introduce new charges and fees upon services upon which we depend, immediately harming millions of Latinos and other consumers nationwide.

I understand that the FCC is considering applying "in-state" access charges and other fees on certain prepaid calling card services. Many Latinos, particularly those on fixed incomes or those establishing a credit history, bank accounts and other means necessary to subscribe to local telephone service, rely upon these prepaid calling cards to stay connected at set affordable rates. Students, immigrants, senior citizens, and others face similar challenges.

As a result, prepaid calling cards are the **only** option available – without them, many consumers could, quite literally, be left without access to telephone service. Raising the price of prepaid calling cards will directly harm individuals who can least afford price increases.

Imposing in-state charges would amount to a substantial increase in the cost of prepaid calls, destroying the utility of calling cards to disadvantaged consumers. Allowing the large, local telephone companies to collect such charges, even when they do not sell the calling card to a customer, would drive up prices; thus making these services substantially less affordable. Please look out for consumers and refuse to impose new access charges and fees on prepaid calling card services.

Sincerely,
